

# 3Way Suction Wand

Product sheet

Kitchens or other places where dosing devices are used are often quite busy. The last thing you would want to worry about is the level of available liquids, right? When using the suction lance, your worries will become a thing of the past. You will hear a sound when the liquid is almost finished. All you have to do is replace the liquid and continue working. This means that you need not check the liquid level yourself time and time again. Have a look at the 'buzzert' (sound signal) as well, as you will need it for this product. Are you interested in this 'empty' notifier? Then request a quote now!

## Technische omschrijving

The suction lance allows you to safely manage your chemical usage. When connected to the dosing system it will sound a buzzer when the chemical reaches a critically low level. Suitable for the D1/D2 dish wash pumps. Per pump you need two suction lances. See related products for the buzzer (sound signal) you need additional by these two lances.
