

Drip tray 500 ml, SH E 26 - ingo-man version

In a clean and tidy washroom, you do not want to be confronted with soap residue. You can prevent this by also using the MediQo drip tray.

By placing the drip tray under the opening of the soap dispenser, soap residue is collected easily. You can put the drip tray in space by sliding the stainless steel tray round the soap dispenser. Thus, the tray will be directly under the opening of the dispenser.

With the drip tray for the 500ml dispenser, unwanted soap residue belongs to the past. Ask for the quote.
