

Soap dispenser 900 ml refillable plastic

Product sheet

When designing PlastiQline accessories we always look for a balance between shape and function. The soap dispensers are representative with their tear drop at the front and round lines. However they are extremely functional as well. This soap dispenser is for almost one litre of cleaner. You can choose the refill: alcohol gel, fluid soap, lotions or cream. At least that flexibility is a feature of PlastiQline as well as the tear drop. That is appreciated by thousands of users every day. Do you also like to offer your toilet visitors this plastic soap dispenser? Ask for a quote!
