

Spray dispenser automatic 1200 ml

Product sheet

In heavily soiled areas the use of an alcohol spray is a must. The thin alcohol ensures the intensive disinfection of hands and other surfaces. The SanTRAL Spray Dispenser will help you keep all (hand) bacteria at bay.†

Feel free to call it the Ferrari among the soap dispensers. This soap & disinfectant agent dispenser not only excels in design but also in ease of use. As soon as the sensor detects movement it will automatically spread the alcohol over the hands. Typical of this SanTRAL line spray dispenser is the viewing window at the front. You can immediately see if it needs a refill.

Do you like hygienically clean hands? Then it shouldn't take long to decide in favour of the SanTRAL Automatic 1200 ml Spray Dispenser.
